COMPLETE TURN-KEY RENOVATIONS

Since 1981, Church Interiors has participated in over 10,000 renovations. We have renovated small chapels that seat less than 100 people to large "cathedrals" that seat over 2,000 including many churches on the Historical Register. We have regional installation crews that execute work from New York to Florida and as far west as Texas.

Our goal is exactly the same as your renovation committee ... make your church as beautiful as it can possibly be at the lowest possible cost with little or no disruption to your church services.

PROGRAM I – COMPLETE TURN-KEY RENOVATIONS

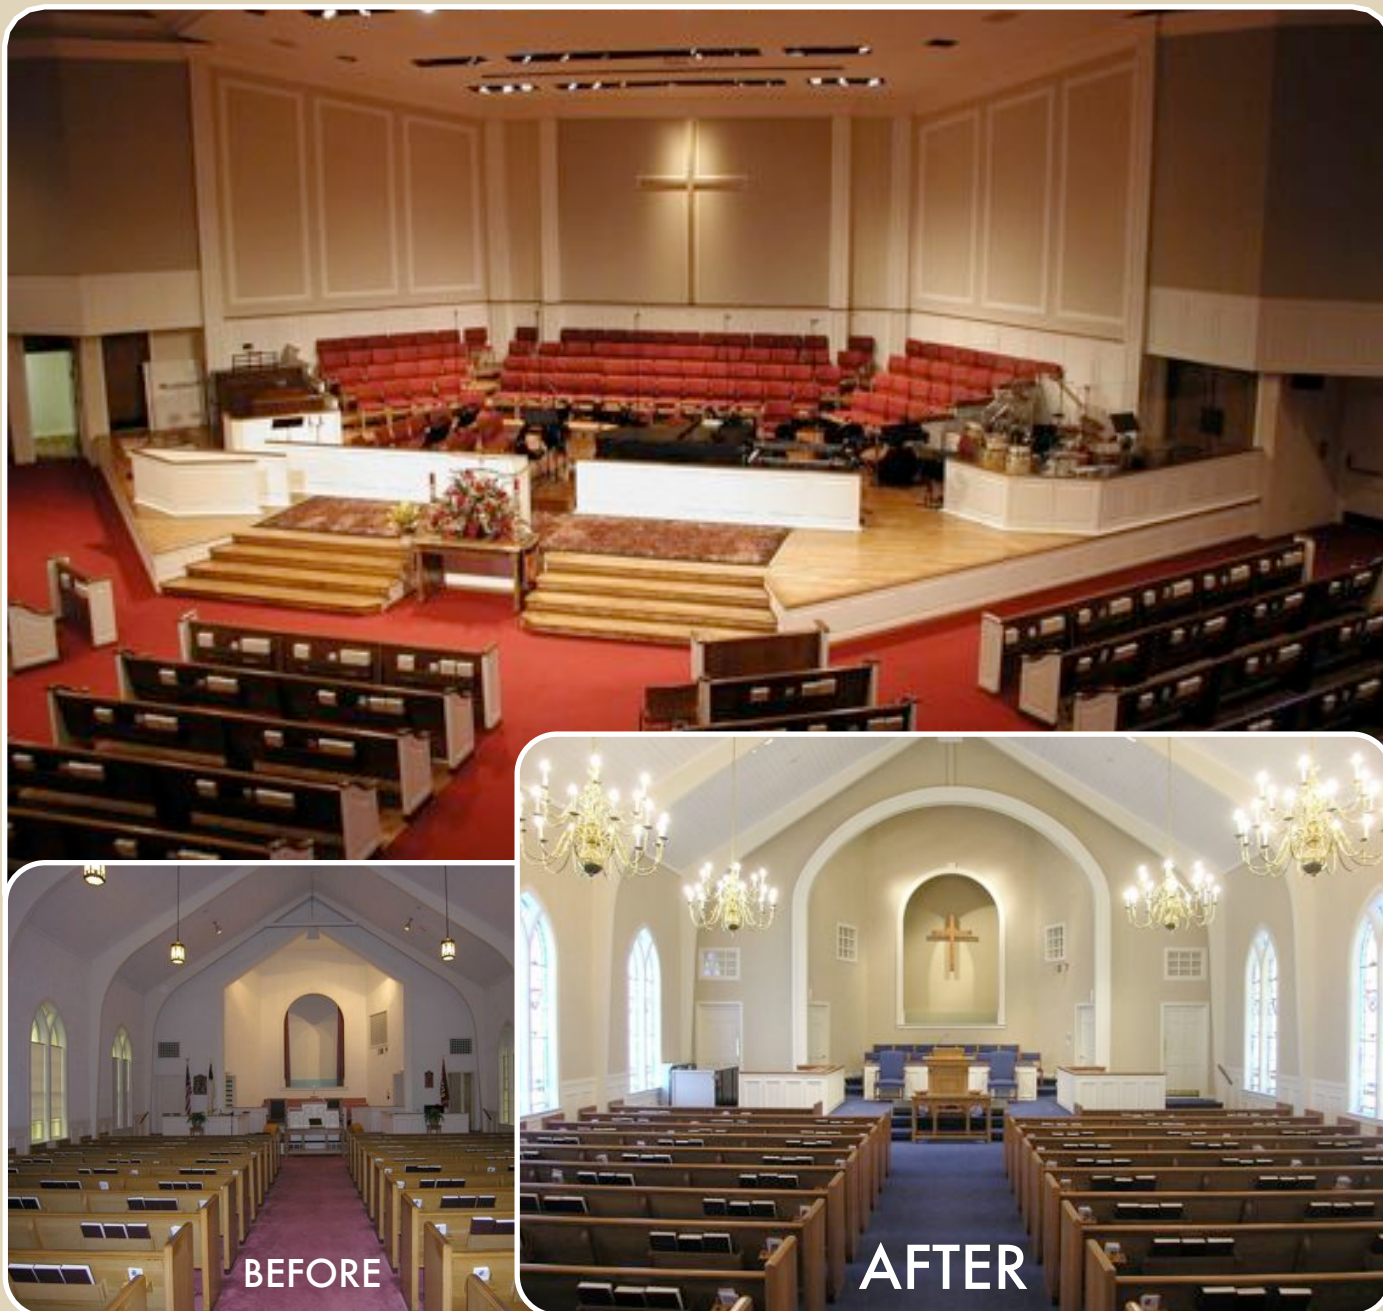

This Program is for the church that would like to turn over the entire renovation to Church Interiors from conception to completion. For example, your church wants to change the look of the front of the church, expand the chancel area, change the ceiling, put in new lighting, etc. We would bring in a designer who would do sketches and drawings for review and approval by your building committee. We would have an interior designer prepare a designer board to coordinate colors. We would prepare a comprehensive proposal. After contract award we would purchase and warehouse all materials and then schedule to perform the actual work in a condensed timeframe that would disrupt church services as little as possible. Under this program we would be responsible for the complete turnkey project including the general construction work.

JOINT VENTURE RENOVATIONS

PROGRAM II - JOINT VENTURE RENOVATIONS

This flexible Program accomplishes the same end result as program I and allows the church to work with their local architect and or contractor. Under this program, Church Interiors would provide the color interior design and perform all of the work except the general construction work. The painting & plaster repair, floor covering, pew refinishing & upholstery, new pews, stained glass, choir chairs, chancel furniture, audio/video etc. would be contracted with Church Interiors.

COSMETIC RENOVATIONS

PROGRAM III – COSMETIC RENOVATIONS

This Program is a renovation in which there is no general construction work. The church would like to update the color scheme which would include carpeting, painting, pew refinishing, upholstering or cushions, etc. We would have our interior designer meet with your committee to help coordinate paints, stains, carpet, fabrics, etc. We would prepare a proposal and if accepted, we would coordinate scheduling and perform the work in a condensed timeframe that would prevent minimal or no disruption to church services. Church Interiors will work with your church on just one service or a complete package.

INTERIOR DESIGN & 3D RENDERINGS

* Church Interiors offers Liturgical design services, color interior design services and professional 3-D renderings. We work with churches exclusively and understand the evolving style of worship that is relevant to today's church. Our interior design board and 3-D renderings make excellent fund raising tools for your renovation project.

ON-SITE PEW UPHOLSTERING

ITEM	SPECIFICATIONS
SEAT FOAM	2", 3", and 4" High Density Thick Polyurethane
BACK FOAM	3/4", 1", 1 1/4" Thick High Density Polyurethane
FABRIC	Rated for heavy duty commercial grade with special pew backing
WARRANTY	15 years on workmanship and materials

- * Upholstering is done on-site from Sunday to Sunday without interrupting church services.
- * Factory upholstery techniques are brought to the job site.
- * Factory upholstered pews are completely disassembled.
- * Fabric is stretched mechanically for a smooth uniform upholstery appearance.
- * Pew re-upholstering costs 1/3 the cost of new pews.

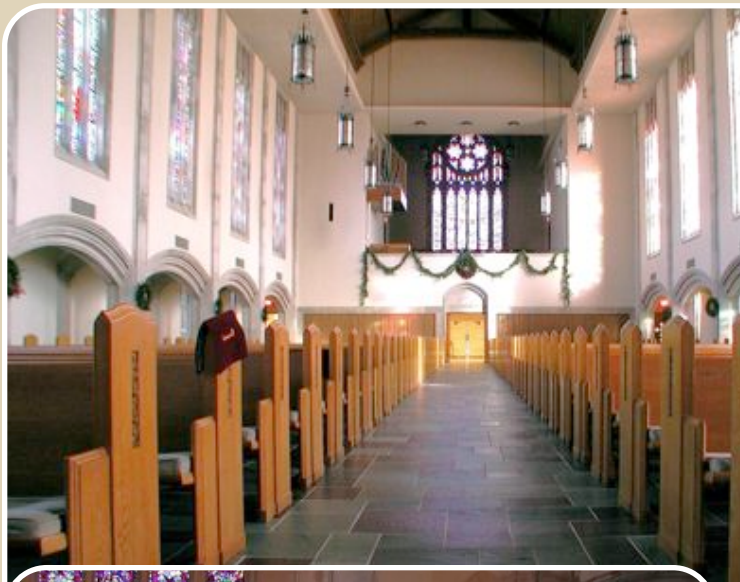

PEW CUSHIONS

ITEM	SPECIFICATIONS
BOXED	Std 2" box cushion with tufted buttons 8" on center
ROLL FRONT	2" thick cushion with waterfall front edge
TAPERED	2" thick cushion ergonomically tapered to 1" front edge
WARRANTY	Cushions are guaranteed for 15 years against fabric wear, seams coming unraveled and buttons detaching

- * Cushions available for straight or curved pews.
- * Cushions are sewn together using French seams with nylon thread.
- * Tufting buttons are necessary to prevent seam slippage and are standard on all cushions.
- * Available in standard 2" Boxed, Roll Front and 2" to 1" Tapered.
- * All cushions styles are reversible.

ON-SITE REFINISHING

ITEM	SPECIFICATIONS
LIGHT REFINISHING	<p>The exposed wood will be chemically cleaned to remove existing dirt, oil and wax build-up to prepare the areas for the new finish. The existing wood surface will be prepped. Two coats of a blending non-toxic finish will be applied to blend in areas where the existing finish and stain has worn off. A third coat of clear permanent finish will be applied.</p>

* Light refinishing has its limitations. It is not appropriate for pews that have sunlight damage, excessive scratches and water damage. Light refinishing cannot be used to change the stain color. However, light refinishing is a very cost effective process to enhance the existing appearance and extend the life of the pews. Light refinishing is a permanent process. The finish can be done on-site without interruption of church services.

COMPLETE REFINISHING

AFTER

BEFORE

- * Pew refinishing cost less than new pews of the same quality.
- * Many churches have original solid wood furniture that has historical significance.
- * Restoring the original furniture preserves the historical integrity of the sanctuary.

PEWS

TRADITIONAL

COLONIAL

MODERN

ITEM	SPECIFICATIONS

- * Hardwood Floor Refinishing
- * New Hardwood Floors
- * New Porcelain Tile
- * New Luxury Vinyl Tile
- * Stone Floor Refinishing
- * New Stone Flooring
- * Custom Tile Designs

PLASTER REPAIR & PAINTING

ITEM	SPECIFICATIONS
PLASTER REPAIR	Loose plaster must be removed down to the lathe and substrate to provide a solid foundation for new plaster. Any loose lathe must be secured or replaced. All stress and cracks must be dug out at least 1/4" and repaired with flexible elastomeric compound. New finish coat shall be a flexible elastomeric coating that hides existing and future spider cracks. Surface patching and skim coating cracks is not recommended.

- * Plaster finishing and repair is a specialized trade that requires special materials & techniques.
- * Typical drywall patching will be obvious and cracks will return in 3 - 6 months.
- * Elastomeric plaster compound & elastomeric finish coats give the surface flexibility.
- * Proper plaster repair & prep work will take twice as long as painting. If painting takes 2 weeks, plaster repair and prep work will take 4 weeks.

LED RETROFIT LIGHTING

- * NEVER CHANGE BULBS
- * TRIPLE LIGHT LEVELS
- * SAVES ENERGY
- * DESIGNED TO LAST 50 YRS
- * DIMMABLE LED MODULES
- * RECESSED LED CANS

- * Complete restoration and re-leading of existing windows services.
- * Custom built aluminum frames in white, clear and bronze finishes.
- * Protective covering available in GE Lexan XL or Tempered glass.
- * All windows and frames will be installed from Sunday to Sunday.
- * Engineered windows and frames meet local hurricane codes.

PROTECTIVE COVERING

CHILDREN'S CHURCH

BEFORE

AFTER

* Our designers and skilled artisans can transform your children's educational areas with wall art and furnishings which include spiritually related themes. We believe the children's church should be a fun and interesting place that attracts both children and their families...a place that is safe and clean but more importantly, a place that children can't wait to come to next Sunday. If your mission is to grow your church, attract young families, and teach Christian principals at an early age, we can help. Let us help you create that Wow Factor for your entire children's area.

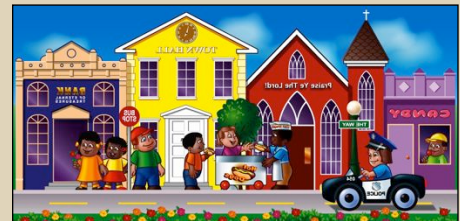

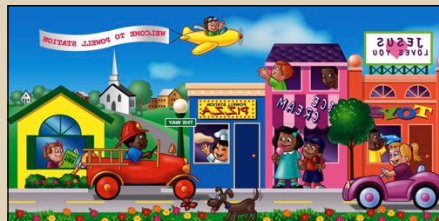

CLASSROOM FURNITURE

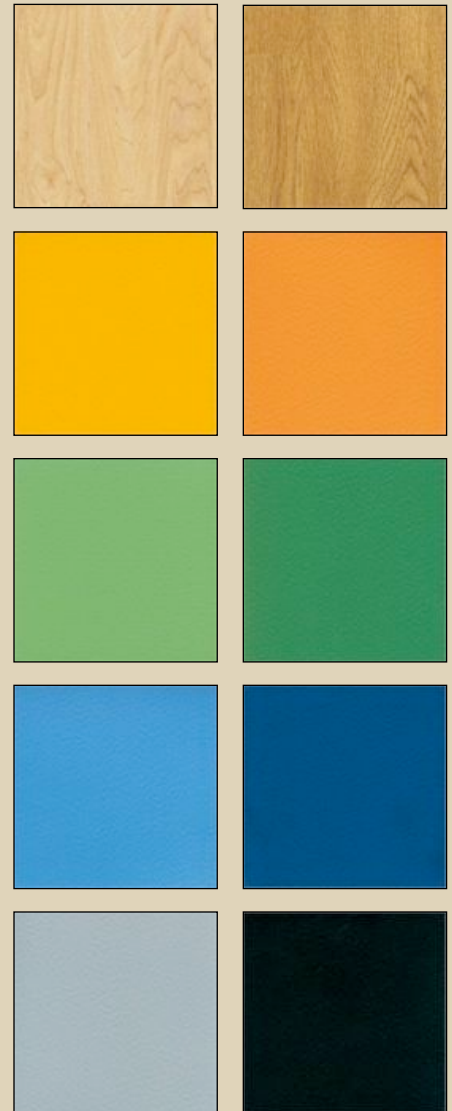

ITEM	SPECIFICATIONS
Adjustable Activity Tables	Available round, rectangle, horseshoe, trapezoid shapes
Stackable Plastic Chairs	Available in 10", 12", 14", 16", 18" Heights
Misc Furniture	Desks, Double Easels, Storage Cubbies, Dramatic Play
Full Size Wall Murals	Easy to install, dozens of faith based designs

* Church Interiors educational specialist will provide layouts and design recommendations for nursery and classrooms for all ages at no charge. Package pricing will provide substantial savings.

FULL SIZE WALL MURALS

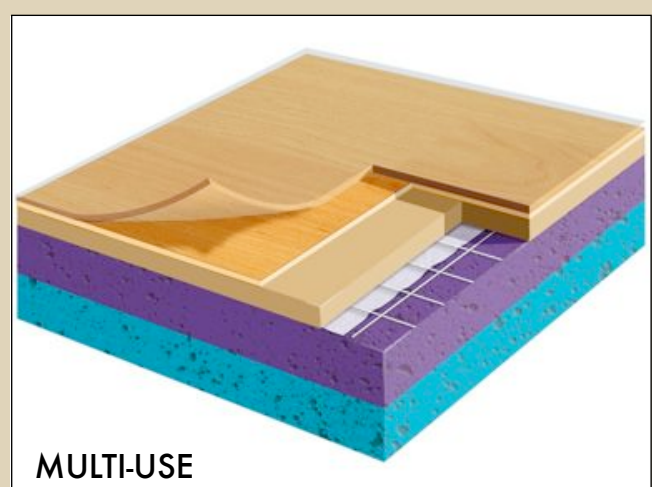

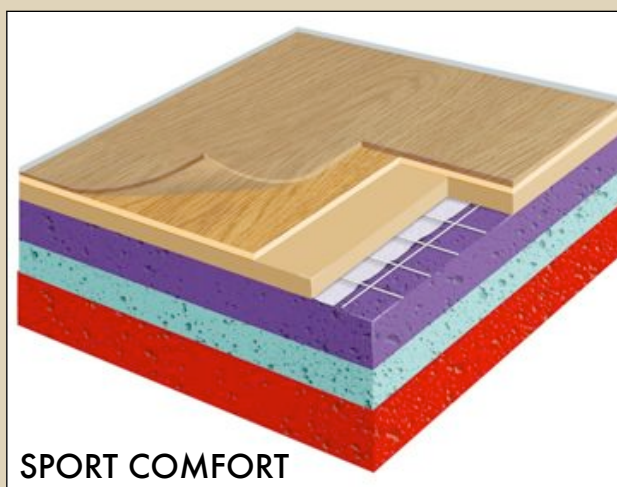

SPORTS FLOORING

Helpful Information:

- * Very high density polyurethane specialty sports flooring 7 mm thick.
- * Provides at least 29 % shock absorption helping to prevent injury.
- * 250 psi static load aids in indentation resistance and durability.
- * Ideal for churches that use gyms with multi-purpose seating.
- * Chair indentions will recover faster than other sports floors.
- * Intermediate wear allows 98 % ball rebound.
- * UV cured urethane requires no waxing.

Available with basketball lines, volleyball lines, volleyball sleeves and Awana game lines.

RENDERINGS

* Our graphic designers use your project specific selections in each rendering so that the congregation can get an accurate representation of the proposed renovation.
